You can use this if you want: Thanks.

Regional Administrator Shaun McGrath regrets that he couldn't attend the conference. You probably are aware of the Gold King Mine incident on the Animas River in Colorado and into the San Juan River of New Mexico and the Navajo Nation Indian Reservation. Shaun has made attending to the incident and the people affected by it his highest priority. He has been working long hours in Durango, Colorado working at the Unified Command location and in the affected communities there.

I was figuring that. I think one EPA panelist is fine. Honestly I believe they asked Shaun because ken had not replied. I can handle his talking points along with mine. No problem
